

KeyQuest

Learn to type the right way, one lesson at a time.

A fun, step-by-step way to learn touch typing — typing without looking at your hands.

WHAT KEYQUEST DOES

KeyQuest teaches **touch typing** — typing without looking down at your hands — in small, friendly steps. Start on the **home row**, then add new keys, real words, sentences, numbers, and capital letters, just like a real typing course.

The on-screen keyboard **lights up the next key** and tells you **which finger** to use, so you build the correct habits from the very first lesson.

WHAT'S INSIDE

Real Course

Home row first, then new keys, words, sentences, numbers, and capitals — in order.

Finger Guidance

The keyboard lights up the next key and shows which finger to use.

Stars & Speed

Earn up to 3 stars per lesson, beat your best WPM, and watch accuracy climb.

Players

Each player has their own progress, so the whole family can practice.

Certificate

Finish the course and earn a printable KeyQuest certificate.

Offline

Once on your Home Screen it works fully offline — no internet needed.

WHO IT'S FOR

First-Time Typists

Never learned to type properly? Start at the home row and build real habits.

Kids & Students

Clear, game-like lessons with stars and speed goals keep practice fun.

Speed Builders

Already type but want to go faster and more accurately without looking down.

Whole Family

Separate players each keep their own progress on the same device.

PRIVATE, OFFLINE & AD-FREE

Once it's on your home screen, KeyQuest **works fully offline** — no internet needed. Everything runs on your device: no account, no sign-in, and nothing is sent to a server.

And because it's **privately developed by Coniker Systems™**, there are **no ads — ever**.

GET KEYQUEST ON YOUR IPAD

It's a free web app — nothing to buy, no App Store needed. To keep it on your iPad or iPhone so it opens like a normal app and works offline:

1. In **Safari** (you're likely here already), tap the **Share** button — the square with an arrow.
2. Choose **"Add to Home Screen."**
3. Tap **Add** — a KeyQuest icon appears on your home screen.
4. Open it from the home screen. It runs full-screen and **works offline**.

💡 Tip: rest your pointer fingers on **F** and **J** (feel the little bumps) and keep your eyes on the screen, not your hands.

GETTING NEW FEATURES

New lessons and features are added regularly. To get the latest version, just tap  **Update** on the home screen while connected to Wi-Fi — it refreshes itself, and your progress is kept. You can check the version number at the bottom of any screen.

Have an idea or found a problem? Tap  **Feedback** on the home screen to send it straight to us — your feedback shapes what gets built next.
